

RealPOS™ 21

Point-of-Sale terminal

- Intelligent Integration of Functionality
- Small Footprint and Low Profile
- Reliable, Trusted Brand Name
- Superior Value

Affordable, Powerful and Reliable

The open and scalable architecture of the NCR RealPOS 21 supports a broad selection of operating systems, applications and retail peripherals – at a price that equates to its small size. The NCR RealPOS 21 is designed for retailers that require an all-in-one POS workstation – from a reputable company – that provides a high degree of lifecycle management and reliability not commonly found with PC and non-brand solutions.

Comprehensive Choice of Peripherals

The extensive list of certified NCR peripherals is second to none. You may select from a variety of printers, scanners, keyboards, customer displays, cash drawers, and payment devices to develop a custom configuration that meets your specific requirements.

Retail Hardened

The NCR RealPOS 21 complies with NCR's strict reliability standards – which are rated among the highest in the industry. Design – from the smallest to the largest component – is specified to operate within the harshest retail environments. The proof and value of NCR reliability standards may be found within the multitude of NCR POS terminals still in operation far beyond their life expectancy.

Simplified Service

Designed for quick access to critical components, the NCR RealPOS 21 features tool-free front access to the hard disk drive and power supply. What's more, the optional MSR, Compact Flash memory, and customer display may be quickly installed or replaced without opening the cabinet.

With its enhanced serviceability and remote management capabilities via NCR Retail Systems Manager – the NCR RealPOS 21 reduces downtime, minimizes operational disruptions, and simplifies system upgrades.

NCR Service and Support

Certified NCR RealPartner resellers offer a complete portfolio of consulting, development, integration, maintenance and support services.
