

RealPOS™ 30

Point-of-Sale terminal

- Compact, Space-Saving Design
- Flexible Configuration Options
- Enhanced Peripheral Connectivity
- Superior Investment Protection

Affordable, Powerful and Reliable

Today's competitive retail environment requires flexible, reliable and stable point-of-service (POS) solutions that enable retailers to improve productivity and customer service while lowering costs. The NCR RealPOS 30 is an affordable POS solution optimized for retail, supporting a broad range of certified NCR peripherals and applications.

Small Yet Powerful

The NCR RealPOS 30 is a compact POS solution that combines the reliability and security of a retail hardened POS terminal with the performance and flexibility of industry-standard PC technology. With an open architecture and powerful Intel® processor, the NCR RealPOS 30 supports the latest POS applications for Windows® or Linux® to help you service your customers quickly and efficiently. And, it all fits in a small footprint that helps conserve valuable space at the point of sale.

Flexible to Adapt to your Environment

The versatile NCR RealPOS 30 can be configured as a disk-less thin-client or a full-function disk-based POS system. To complete your POS solution, choose from NCR's extensive line of peripherals, including printers, displays, keyboards and scanners. As your requirements grow, a full-height PCI slot provides added flexibility to support new functionality such as wireless networking.

Superior Connectivity For Retail

With a generous supply of RS-232 and USB interfaces, the NCR RealPOS 30 enables you to protect your investment in legacy serial devices or choose from the growing list of USB peripherals. The powered peripheral ports and 24V printer interface simplify cable management and reduce potential points of failure.

Reliable Stable Solution

To ensure the highest quality and reliability, the NCR RealPOS 30 undergoes comprehensive environmental and compatibility testing and is manufactured under strict NCR standards. Unlike general purpose PCs that are constantly changing, the NCR RealPOS 30 offers a stable, managed platform for extended POS rollouts and the motherboard features Intel-embedded components to support the longer lifecycles that retailers expect. All of these features combine to protect your investment.

NCR Service and Support

The NCR RealPOS 30 is supported by our responsive global services team offering a complete portfolio of consulting, development, integration and maintenance services. Retail experts will work closely with you to customize a solution that will support your business objectives and deliver the value that you - and your customers - expect.
