The basic software is enhanced by a comprehensive layer of emulation and synchronization utilities, resulting in a compelling business tool for wireless and mobile connectivity to the Internet and Intranet.

The SUMO ST375 offers a bright 8.4" TFT-LCD screen that boasts an 800x600(SVGA) resolution, as well as a choice of wireless environments. The 802.11b wireless LAN is ideal for home, office and campus usage. A CompactFlash card slot offers local data and application access, with a USB port supporting a full range of peripheral devices.
